Drs. Thomas J. Balshi and Glenn J. Wolfinger

Pi Dental Implant Center

Fort Washington, Pennsylvania

ASK DRs. BALSHI AND WOLFINGER

WHAT STEPS HAVE YOU TAKEN TO EDUCATE THE PUBLIC?

We were featured on "Good Morning America," performing live surgery in 2005, and appeared on "The Today Show" in 2008, showcasing our popular Teeth In An Hour protocol to replace dentures with permanent teeth.

WHAT ACCOMPLISHMENTS ARE YOU MOST PROUD OF?

We take pride in our trademarked Teeth In A Day procedure, as well as our incorporation of exclusive technology, enabling us to perform dental implant procedures on patients with minimal bone, without the use of bone grafts.

WHAT IS THE PI DENTAL IMPLANT CENTER BEST KNOWN FOR?

We are known for creating very natural smiles. Besides the application of dental science and biomedical engineering, we study each face and each personality. There is a perfect smile for every person. Together with our lab team on site, we can create that smile.

Natural smiles in a single visit

According to Dr. Balshi, Teeth In A Day, one of the practice's driving axioms, reflects the doctors' shared goal with each patient they treat: to restore function and esthetic quality in a single-day procedure. "Our systematic treatment plans enable us to restore a broken smile without the need for frequent appointments," says Dr. Balshi. "Using a rigid acrylic or titanium framework supported by implants, the process is expedited for immediate function." Dr. Balshi creates a visual image: "Picture a picket fence with each picket representing a tooth. The fence post goes into the ground, which, in this instance, is the jawbone, and the framework is the cross member." "It provides those whose teeth cannot be saved with a permanent solution," adds Dr. Wolfinger. "We remove the natural teeth and clean the mouth, then fix the dental implants into the bone and connect the new set of teeth."

BEFORE

AFTER

TEETH IN A DAY

Missing teeth in multiple areas of her mouth, this 20-year-old was an ideal candidate for the Pi Dental Implant Center's Teeth In A Day protocol. "She now smiles with confidence," says Dr. Balshi. Adds Dr. Wolfinger, "Her teeth look natural, like she was born with them."

BEFORE

AFTER

SPLENDID SMILE

With failing crown restorations and multiple missing teeth, this 52-year-old was unhappy with the appearance of her smile. She came to Pi Dental Implant Center for a consultation and was recommended for the Teeth In A Day implant procedure for her upper arch and lower jaw. "The result is a complete and uniform smile," Dr. Balshi says.

“historically successful.
internationally respected.
scientifically pristine.”

TODAY, THE PI DENTAL IMPLANT CENTER AT THE INSTITUTE FOR FACIAL ESTHETICS ENJOYS AN INTERNATIONAL REPUTATION, WITH A MULTI-LINGUAL STAFF OF 40, TWO ON-SITE LABS, MORE THAN 25 YEARS OF EXPERIENCE, AND THE PLACEMENT OF 33,000 BRÄNEMARK DENTAL IMPLANTS. WORKING WITH DR. GLENN J. WOLFINGER, DR. BALSHI PRIDES HIMSELF ON THE VAST ARRAY OF SERVICES THEY OFFER.

ABOUT DRs. BALSHI AND WOLFINGER

WHAT IS YOUR CLAIM TO FAME?

We have never had to turn a patient away. Everyone leaves with an exciting new smile.

WHAT ARE SOME OF THE SERVICES YOU OFFER?

Most of our patients undergo extreme smile makeovers, as many of them have advanced periodontal disease, or imperfect or missing teeth as a result of congenital abnormalities, trauma, decay or natural aging. We

also provide complete cosmetic and restorative care, including veneers.

HOW WOULD YOU BEST SUMMARIZE YOUR APPROACH?

We comprehensively treat functional and esthetic issues. Patients come to us knowing they have a problem, but not the scope of the problem. Our common philosophy is that there is always a solution.
